General

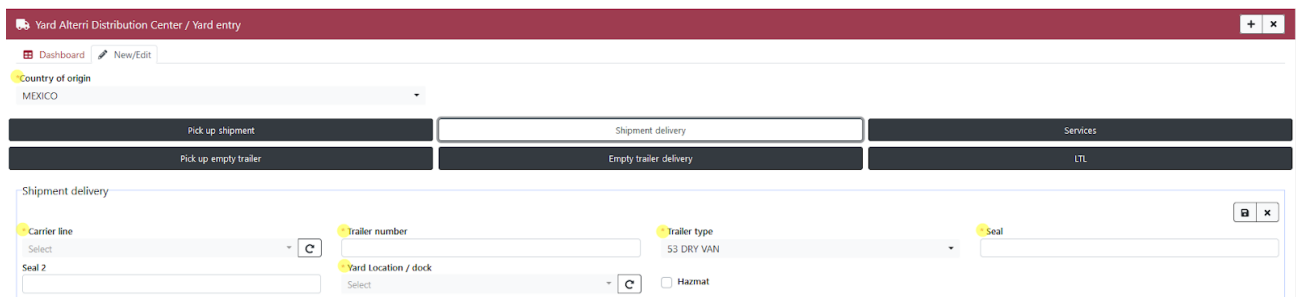

Mensajes del sistema

Los mensajes del sistema de advertencia aparecen en la parte superior derecha.

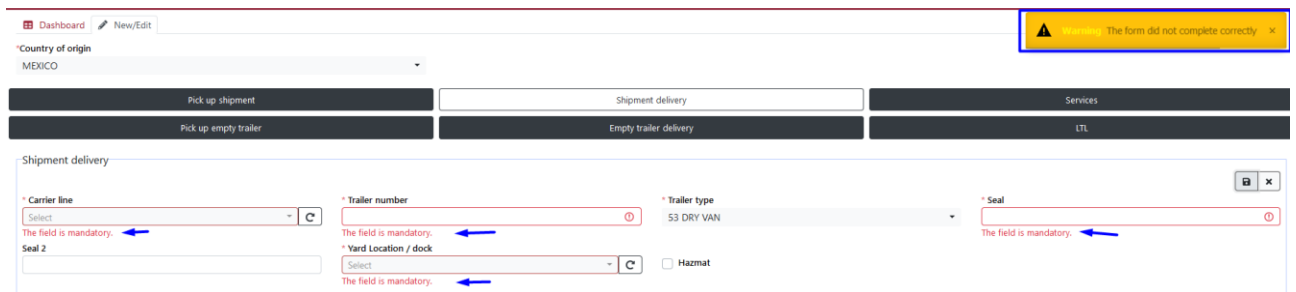

Campos requeridos

Los campos marcados con un asterisco en rojo (*) son requeridos por el sistema.

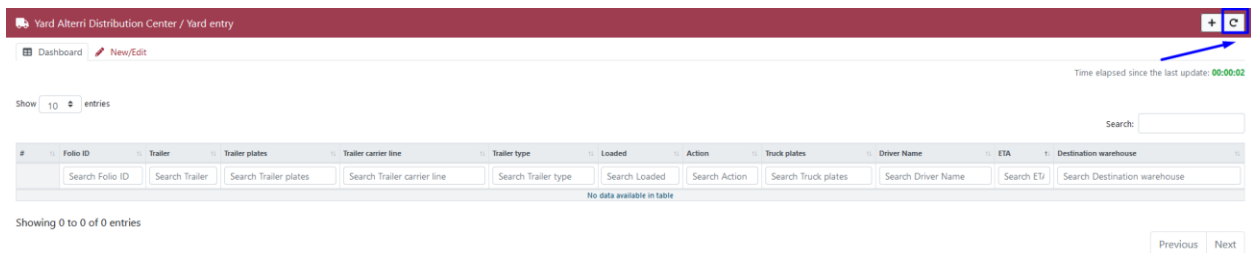

En caso de que no se hayan capturado al momento de guardar la información, aparecerá el siguiente mensaje se marcará de color rojo, con una leyenda en la parte de abajo.

Recarga de tableros

Los tableros del sistema cuentan con el siguiente botón para actualizarlos.

Ubicaciones

Si el control tiene la leyenda de "*Driver location*" significa que el chofer aún se encuentra en el almacén y moverá la caja que le corresponde

| | |
|------------------|-----------------|
| Current location | Driver location |
| YARD D11 | DOCK - 24 |

Si el control tiene la leyenda de "*Assign new location (jockeys)*" significa que se le asignara un movimiento al mulero

| | |
|------------------|-------------------------------|
| Current location | Assign new location (jockeys) |
| YARD F60 | DOCK - 25 |

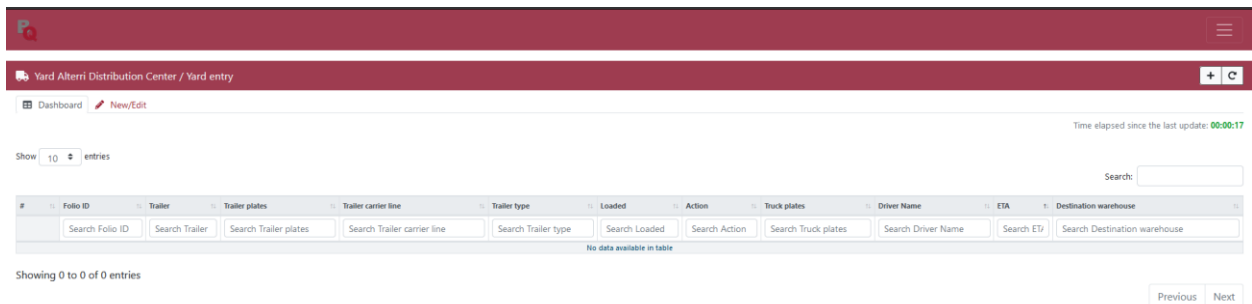

Sistema de administración de patio

Entrada de patio

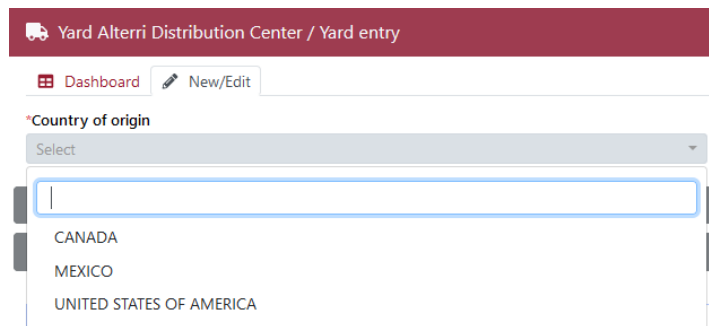

Tablero de preregistro

El tablero de esta modulo corresponde al listado de choferes que se han preregistrado, con la finalidad de generar una entrada rápida.

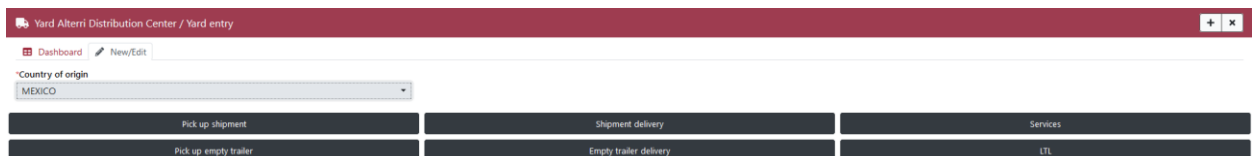

Nuevo/Editar

El primer dato solicitado es el origen del embarque

Posterior identificar el proceso que el chofer viene a realizar, es importante saber este dato, ya que la información solicitada varia.

Tipos de entrada

1. Recoger embarque

Entrada de tractor con caja

Aquí se requieren los datos de la caja que viene por la mercancía. Ingresando también el (los) pickup(s) que viene a llevarse, así como los datos del número de embarque y destino.

***Driver license number**

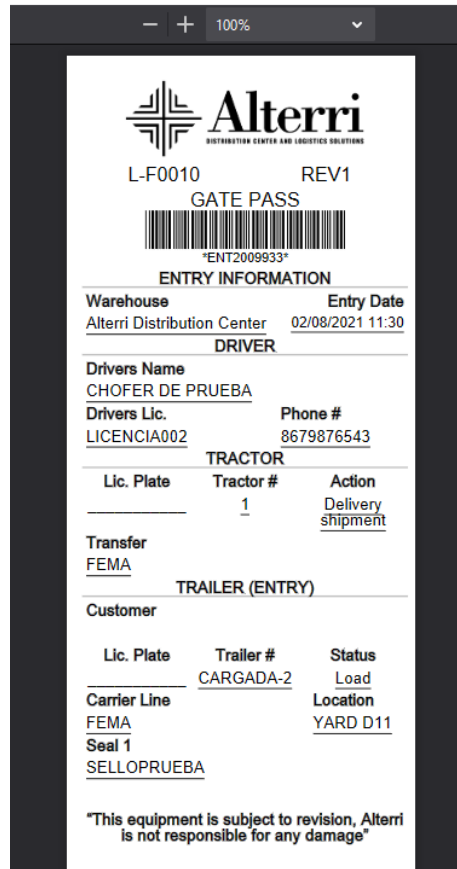

LICENCIA

LICENCIA

Generación de pase de entrada

Al grabar la entrada de patio se genera el pase de entrada y se cargan las fotografías correspondientes del embarque según el tipo de entrada lo requiera.

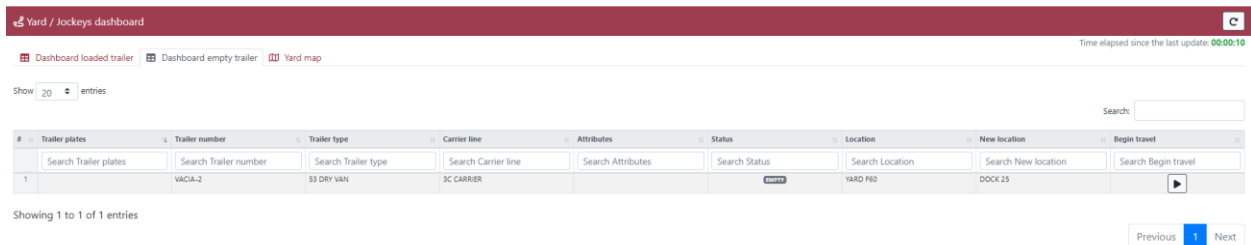

Tablero de muleros

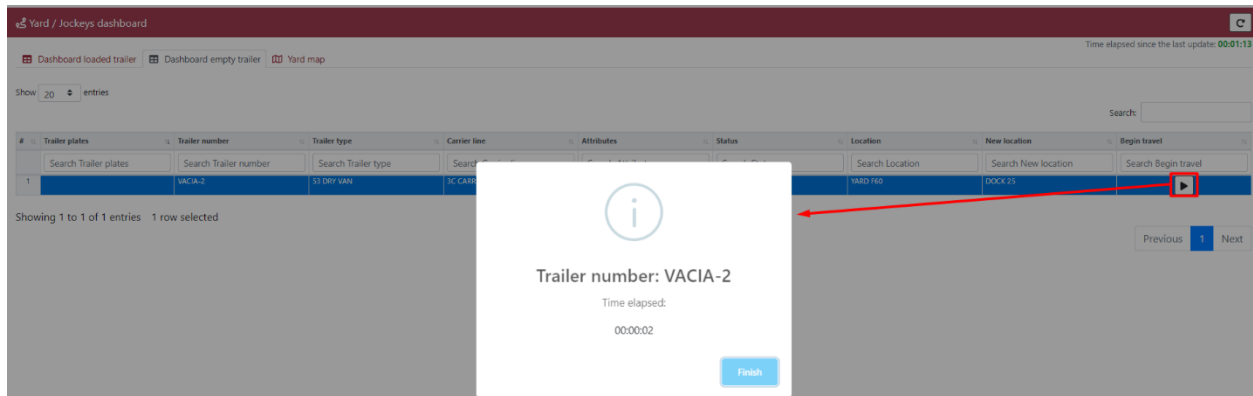

Movimiento de cajas

Se tienen las pestañas de caja cargadas, cajas vacías, además de un mapa de la yarda, donde se indican los espacios disponibles y ocupados.

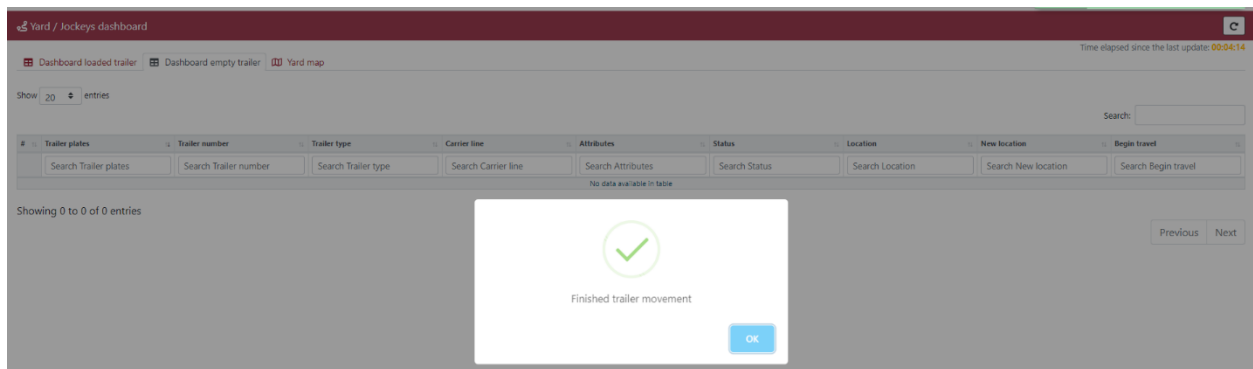

Se visualizan además de los datos de la caja a mover, la posición actual de la caja así como la posición solicitada.

Damos clic al botón "play" de la caja que se va a mover y finalizamos el cronometro una vez colocada la caja en la posición solicitada.

Aparece el mensaje indicando el final del movimiento y dicho registro se elimina del tablero.

Tablero de salida de patio

En este tablero se visualizan los tractores sin caja y con caja vinculada.

Atributos

En espera

Si un embarque tiene este atributo, no se podrá dar salida.

NOTA: Los datos de la revisión de las cajas, pueden hacerse antes o durante el proceso.

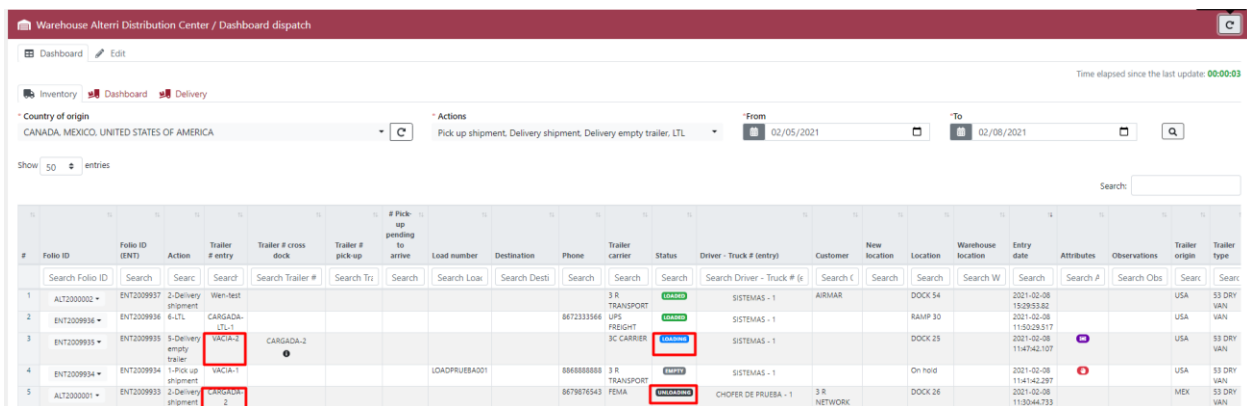

Indicamos el número de montacargas que se está utilizando y grabamos.

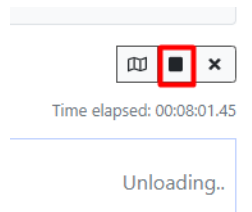

Inicia el cronometro.

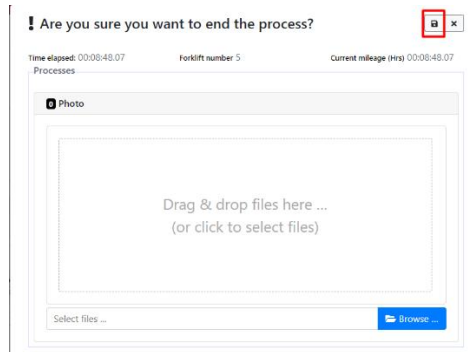

Los estatus de la(s) caja(s) cambian durante el transcurso de la tarea en el tablero de despacho.

Finalizamos la tarea.

Agregamos fotografías en caso de ser requerido y grabamos.

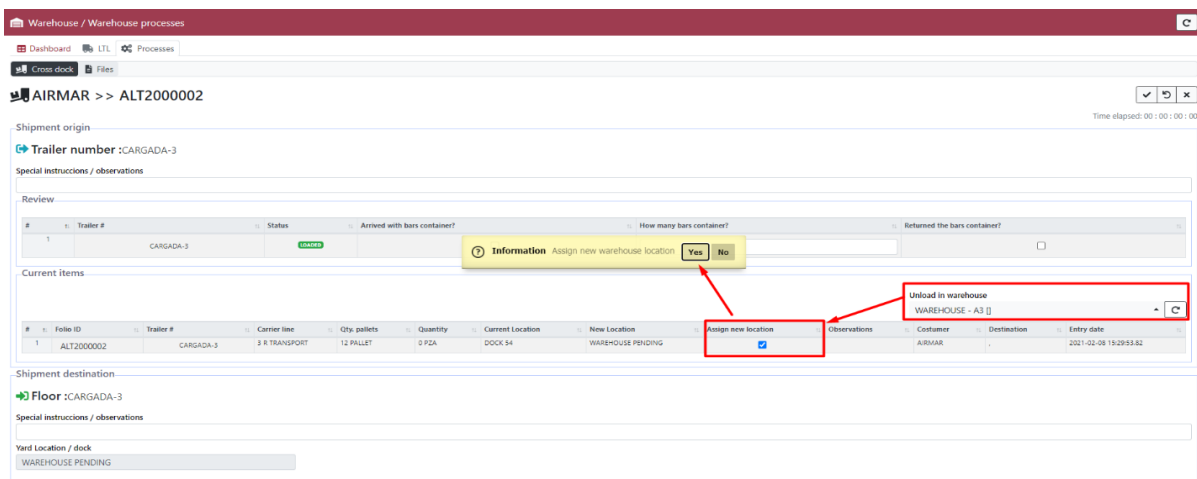

El supervisor deberá confirmar la tarea ([Tablero Supervisor → Confirmar tarea ↗](#))

Descarga a piso

En la sección del "origen embarque" podemos ver las partidas y la ubicación que se asignó desde despacho.

En caso de que se requiera ajustar la ubicación previamente indicada, se localiza un control con las ubicaciones del almacén, se indica donde se colocara la mercancía y se seleccionan las partidas que se les asignara la nueva ubicación.

Procedemos a iniciar la tarea y una vez terminada el supervisor deberá confirmar la tarea ([Tablero Supervisor → Confirmar tarea ↗](#))
